

KESSEY-PROG (v1.0)

Key learning:

- 1) Remove the Kessy;
- 2) Attach clip-connector to the EEPROM chip;
- 3) Run the procedure PROGRAM TP;
- 4) Select the key number that you want to program;
- 5) Place the key (chip) on the coil of the programmer.

There are additional features:

- Programming dealer key (MAKE DEALER TP). When performing the procedure you get a login, which can be used during the procedure key programming using the standard diagnostic equipment.
- Testing key (locked or unlocked).
- Return the original content of the EEPROM.

So you can program even used keys in Kessy...
