TK-Prog V2.01

Lexus / Toyota / Subaru smart-key registration solution

Supported model range

Lexus
LX 570, GX 460, RX, LS 460, GS, IS

Toyota
Land Cruiser 200, Land Cruiser Prado, RAV4, Highlander, Venza, Corolla, Camry

Subaru
Impreza, Forester, Legacy, Outback

TK-Prog is advanced equipment set for electronic smart-key registration within Lexus, Toyota and Subaru cars.

Key types: 94, 4D, 9F, 98, 88, 9F.

TK-Prog main functions

- Primary smart-key registration in Certification unit (it allows to start the car without original key)

- Permanent smart-key registration (including keyless start and remote door lock operation)

- Smart-key testing for compatibility with the Certification unit (smart-key type detection)

- Certification unit memory backup and restore, reset into initial state (if an unexpected situation occurs during programming)

- Odometer correction by means of in-circuit EEPROM programming

TK-Prog V2.01

Lexus / Toyota / Subaru smart-key registration solution

System advantages

- TK-Prog allows to start the car without any original key.

- Smart-keys registration procedure is performed only in the Certification unit. No need to program immobilizer unit, steering wheel latch unit. This considerably simplifies and accelerates registration of smart-keys.

- Automatic smart-key type detection (for each particular car) by reading the Certification unit memory. Support for transponder type: 94, D4, 98, 88, 9F.

- Used smart-keys registration possibility (not only brand new keys).

- Simple user interface and operation sequence.

- It is possible to limit number of keys, which could be registered.
