

# TES PRO MERCEDES V2.0

(TESTING EMERGENCY START MERCEDES)

2011 – 2015 MY

The **TES Pro v2.0** device is designed to test the engine start system in Mercedes-Benz cars using the **FBS3** authorization system (2010 - 2015). The device is used when necessary to transport the car to the service center in case of keys lost or the electronic ignition switch does not work.

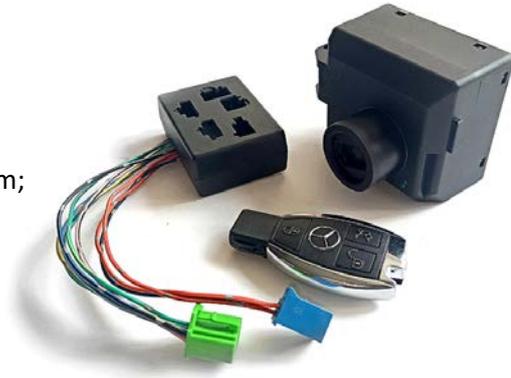

## ➤ **SUPPORTED CARS**

**Mercedes-Benz:** ML, GL, S-Class, E-Class, C-Class, G-class, ( X166, W166, W221, W216, W212, W204, W463- 6 Gen).

## ➤ **THE DEVICE SET INCLUDES**

- The test electronic ignition switch (**EIS**) with special program;
- Special key to this ignition switch;
- Adapter for connecting to other models.

## ➤ **THE FEATURES of USE**

**You don't need to program anything, just install our EIS !!! The device is reusable !!!**

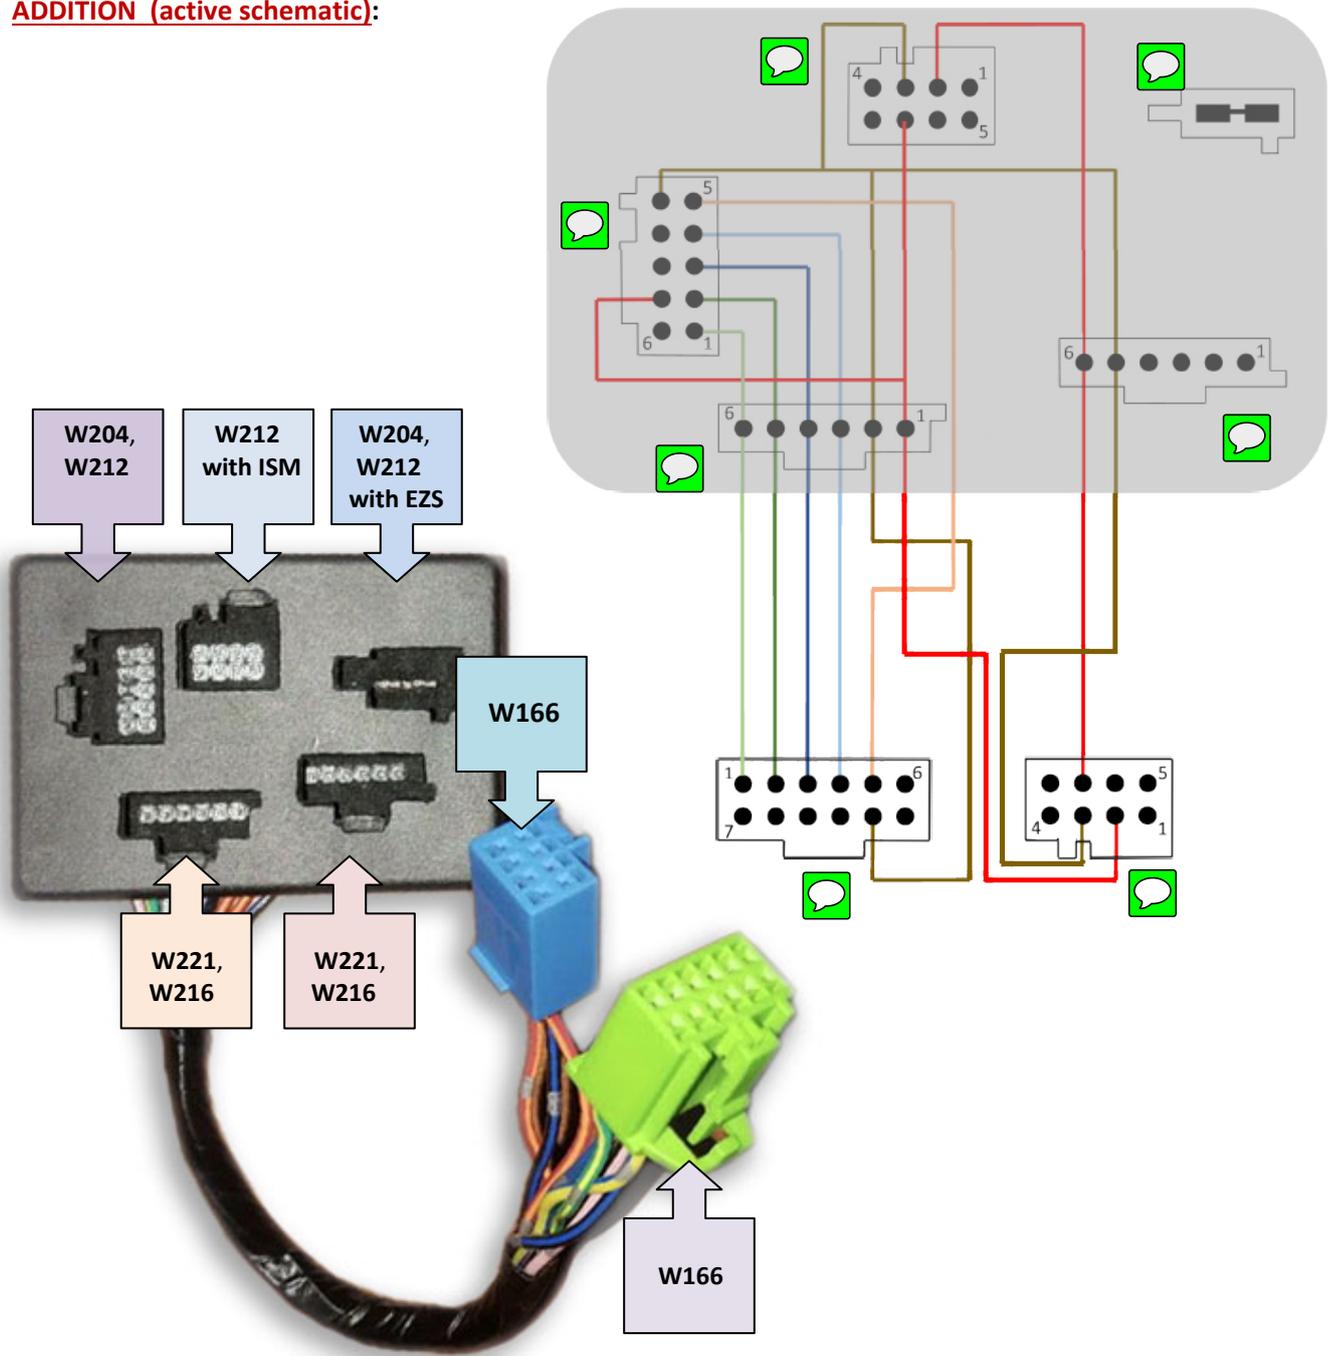

***TES Pro v2.0 is used as a temporary solution in an emergency and is not intended for permanent use!***

## ➤ **OPERATION SEQUENCE (step-by-step instruction)**

1. Disconnect the original electronic ignition switch.
2. Connect the TES Pro v2.0 unit to the connectors, insert the key and switch on the ignition.
3. Short beeps will sound.
4. Wait about 10-15 seconds.
5. A double beep sounds.
6. Switch off the ignition.
7. Switch on the ignition and start the engine.
8. The system is ready for use, you can transport the car to the service center.  
All key buttons work (open , close and disarm the car).
9. If you need to use the original ignition switch, simply install it back and use as usual.
10. If you connect the TES Pro v2.0 when the car is in alarm mode, this mode will immediately turn off.
